DETAILED ACTION

The preliminary amendments of 05/17/2006 have been entered in full. Claims 2 and 17-38 are cancelled. Claims 1 and 3-16 are under examination.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 3-9, drawn to an isolated nucleic acid molecule comprising a sequence of nucleotides that encodes a rhesus monkey dickkopf-1 (rhDkk-1) protein and a process for expressing a rhesus monkey dickkopf-1 (rhDkk-1) protein in a recombinant host cell.

Group II, claim(s) 10 and 12-16, drawn to an isolated and purified rhesus dickkopf-1 (rhDkk-1) polypeptide and methods for determining whether an analyte is an antagonist of Dickkopf .

Group III, claim(s) 11, drawn to an antibody that binds specifically to an isolated and purified rhesus dickkopf-1 polypeptide.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I recites the special technical feature, an isolated nucleic acid molecule comprising a sequence of nucleotides that encodes a rhesus monkey dickkopf-1 (rhDkk-1) protein, which is not required by the methods or the products of Groups II-III.

Group II recites the special technical feature, an isolated and purified rhesus dickkopf-1 (rhDkk-1) polypeptide, which is not required by the methods or the products of Groups I or III.

Group III recites the special technical feature, an antibody that binds specifically to an isolated and purified rhesus dickkopf-1 polypeptide, which is not required by the methods or the products of Groups I-III.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
